Needs Project "On The Boards"

Mountain Plaza is an assisted living community located in Casper, Wyoming. The mountain-lodge character of the architecture is warm and inviting for both residents and guests. The building was thoughtfully designed around a central courtyard to give residents easy access to this amenity. The secured Memory Care neighborhood incorporates all residential components, including its own dining room, living room, activity and life skills area, and a secure garden area to allow residents to freely move from inside to out.
