ABOUT THE PROJECT

Position just west of the Intracoastal Waterway, BREZ at Atlantic Crossing redefines Delray Beach's downtown core, transforming an underutilized shopping center into a vibrant destination that blends residential, retail, and dining. Balancing density with livability, BREZ introduces plazas, green spaces, and walkable corridors that foster connection. Complex challenges—floodplain constraints, tight site conditions, and circulation—were met through creative solutions like a full-site underground parking garage and a new internal roadway. With refined residences and resort-style amenities, BREZ delivers a high-quality, active community that's a model for transformative downtown infill.
